

At Last A Modular Central Vacuum Hose

More Options

MD's Quick Click Hose Kit includes two separate sections (10' and 20' lengths), with an optional 15' length available. Clean nearby, or simply add sections and go the distance!

More Swivel

With Quick Click's triple-action swivel, you work so much faster – with no kinks. Unlike other hoses, Quick Click has three separate 360-degree rotation points. Quick Click literally unwinds itself, ready for use!

More Ease

The Quick Click's hose handle stays attached to your extension tubes – no need to remove accessories. Just click the hose right into the handle. Comes with two handles, and it is so easy to connect the hose sections together!

More Suction

The Quick Click's design completely minimizes restriction, ensuring superb airflow and suction power where you need it most – on floors, carpets, and any high traffic areas. With Quick Click, everyday cleaning is deep cleaning!

More Lifespan

The Quick Click is designed and manufactured for maximum longevity. MD tested it by connecting (hot-swap plug-in) over 20,000 times – and the Quick Click never failed!

How To Order

All of MD's electric attachments are compatible with the Quick Click Hose. Order your electric accessory kit without the hose. Then, simply add the Quick Click hose plus any additional lengths you desire to your order. For ultimate convenience, we suggest you keep hose lengths in areas you may need them most.

Warranty

The Quick Click Modular Hose comes with MD manufacturing's industry-best 3-year warranty and 5-star preferred customer service.
