Replacing The Cord On A Mini Electric Brush

1. Remove the four (4) screws on the bottom of the tool.

2. Remove the top housing.
3. Lift the circuit board plate to expose the cord channel.
4. Remove the cord from the channel and disconnect the two (2) wires from the circuit board.

5. Attach the new cord and insert back into the cord channel.
6. Replace the circuit board plate and top cover.

7. Insert and tighten screws.
